

Title: C# Senior Software Engineer

Facilisgroup is looking for a Senior Software Engineer experienced in .NET software engineering to join our Product Engineering team. This team develops and enhances Facilisgroup's software products and services such as our proprietary CRM and Order Management web-application and E-Commerce platform.

The ideal candidate will lead development and re-engineering efforts, assist in growing a team of engineers, take a hands-on development approach, collaborate with other development teams, product managers and stakeholders to provide continuous updates and improvements to our software products.

This team is one of three teams responsible for delivering continuous software updates and improvements to our end-users. The software you help improve and maintain will be utilized by thousands of Sales Reps in the promotional products industry across North America, and by millions of their clients.

Responsibilities

- Grow and mentor other software engineers
- Lead development efforts for new components of our software products
- Lead re-engineering efforts for distributed versions of existing components
- Document and share best practices with engineers across all teams

Qualifications

- Experience developing web applications and services using C#
- Strong knowledge of current application development trends, architectures, and patterns, such as DDD, Micro Services, SOA and a passion to stay current
- Infectious desire to share your knowledge, mentor and develop your peers through coaching and pair-programming
- Minimum of 6 years of professional software engineering experience
- Excellent verbal and written communication skills
- Fluent in English

Pluses

- Experience building distributed cloud-based applications on Microsoft Azure or other cloud platforms
- Experience with container development and orchestration solutions
- Experience working on CRM, Order Management, or E-Commerce software
- Experience authoring, executing, maintaining, and analyzing the result of unit, integration and regression testing
- Contributions to open-source or personal projects

- Bachelor's Degree in computer science or related discipline
- Previous experience leading a development team

Bonus Points

- Knowledge of the Promotional Products/Advertising Industry
- Previous experience leading a development team
- GitHub account with recent activity

Application Requirements

- Resume
- Cover letter, detailing:
 - Why this job or role appeals to you
 - What you can offer less experienced developers to aid in their growth
 - Why you are interested in working at Facilisgroup

Facilisgroup is a proven, ever evolving company with year over year growth rates of 12-15%. If you see yourself as a fit for this position, send your resume to hr@facilisgroup.com

We would like to thank all applicants for their interest, however only candidates under consideration will be contacted.
